

Ahold Hypermarkets Czech Republic and Slovakia

When the first phase of Stannifer's Olympia Shopping Centre project was realised, Ahold leased the 19,000m² shell and core and appointed Bovis Lend Lease to perform the fit-out of the premises. The success of this project led to the appointment of further fit-outs and a steady flow of new projects with a client that has become one of Bovis Lend Lease's closest partners.

Bovis Lend Lease has become one of the premier providers of construction management services in fitting out Ahold Hypermarkets in the Czech Republic and has been very supportive in Ahold establishing their first store in Slovakia.

"Bovis Lend Lease has been helping us since 1998 in the Czech republic and has been involved in 11 projects there over the past 4 years. The methods of management of construction used by BLL were meeting our needs every step of the way and we can say that the initial commercial relations changed into a solid partnership. We have started expanding into Slovakia this year and we have found the same kind of approach and dedication there with BLL Slovakia" says Teus van Hoek, Ahold's Technical Manager Hypermarkets and Special Projects.
